

3-D Santa

YOU WILL NEED:

Pegboard:

Super-Size
80-30105

Bead Colors/# Beads:

○ Sand 15098 - 44

○ Peach 15033 - 5

● Red 15005 - 1417

● Gold Metallic 15085 - 58

● Dark Green 15010 - 215

● Pastel Blue 15052 - 2

● Light Brown 15021 - 119

● Brown 15012 - 403

● Grey 15017 - 43

● Black 15018 - 1900

○ White 15001 - 2296

NOTE: This project requires 3 bags of white beads, 2 bags of black and red beads, and 1 bag of the remaining colors. You will also need gold/white braided cord, blue and gold self-adhesive gems (2 each), and quick-drying adhesive to complete your project.

Instructions

1. Your Santa will be built in layers to add dimension such as Santa's belly, his beard, fur trim on his suit, and his boots. To save beads, areas on some layers will be hollow. An enlarged photo is on the last page.
2. In order to keep these super-size pegboard patterns at actual size, we have split each one to span two pages. Follow the instructions on each page for cutting and aligning the pattern halves into one pattern.
3. Slide the pattern under the pegboard, then place your beads as indicated.
4. Ask an adult to fuse your designs—see Fusing Instructions below.

Assembly

NOTE: Create the pieces in the order that the patterns are shown in this project sheet. We recommend that you assemble as you complete each pattern sheet to avoid confusing the pieces. When there are multiple layers in one area, position the pieces the way you want them, then glue.

1. Glue Layer 1 to the base.
2. Aligning the boots, add Layer 2.

3. Position the Hat Fur piece on the brim of Santa's hat and glue. Glue the smaller Hat Pompom piece on top of the larger one, then glue to the hat, turning it at a slight angle.
4. Make 2 Mustache pieces and glue together, then glue below Santa's face.
5. Glue the Left Arm in place, then add the Left Sleeve Cuff. Glue the Right Sleeve Cuff in position.
6. Aligning the belt, glue the Belly and Beard piece in place.
7. Centering the Beard 1 over the Belly and Beard, glue it in place. Add the Beard 2 and Beard 3 pieces in order to the center of the beard area of the design.
8. At the center of the belt, glue Buckle 1 then Buckle 2 in place.
9. Before gluing, Layer the Coat Fur pieces in order, starting with piece 1 at the left, then 2 at the right. Continue working from side to side, overlapping pieces and building toward the center. Piece 5 is at the center and piece 6 directly on top of it. Once you know how you want it to look, glue the pieces in place.
10. Layer the pieces in order of each boot and glue in place on your Santa; all pieces but the last one align at the bottom.
11. Glue the two stand pieces together. Slide Santa's boots into the openings to make him stand. Glue as needed.
12. Glue two blue gems to Santa's eyes, and two gold gems to his buckle. Tie the braided cord into a knot and glue to his pack.

Fusing Instructions—Only Adults Iron

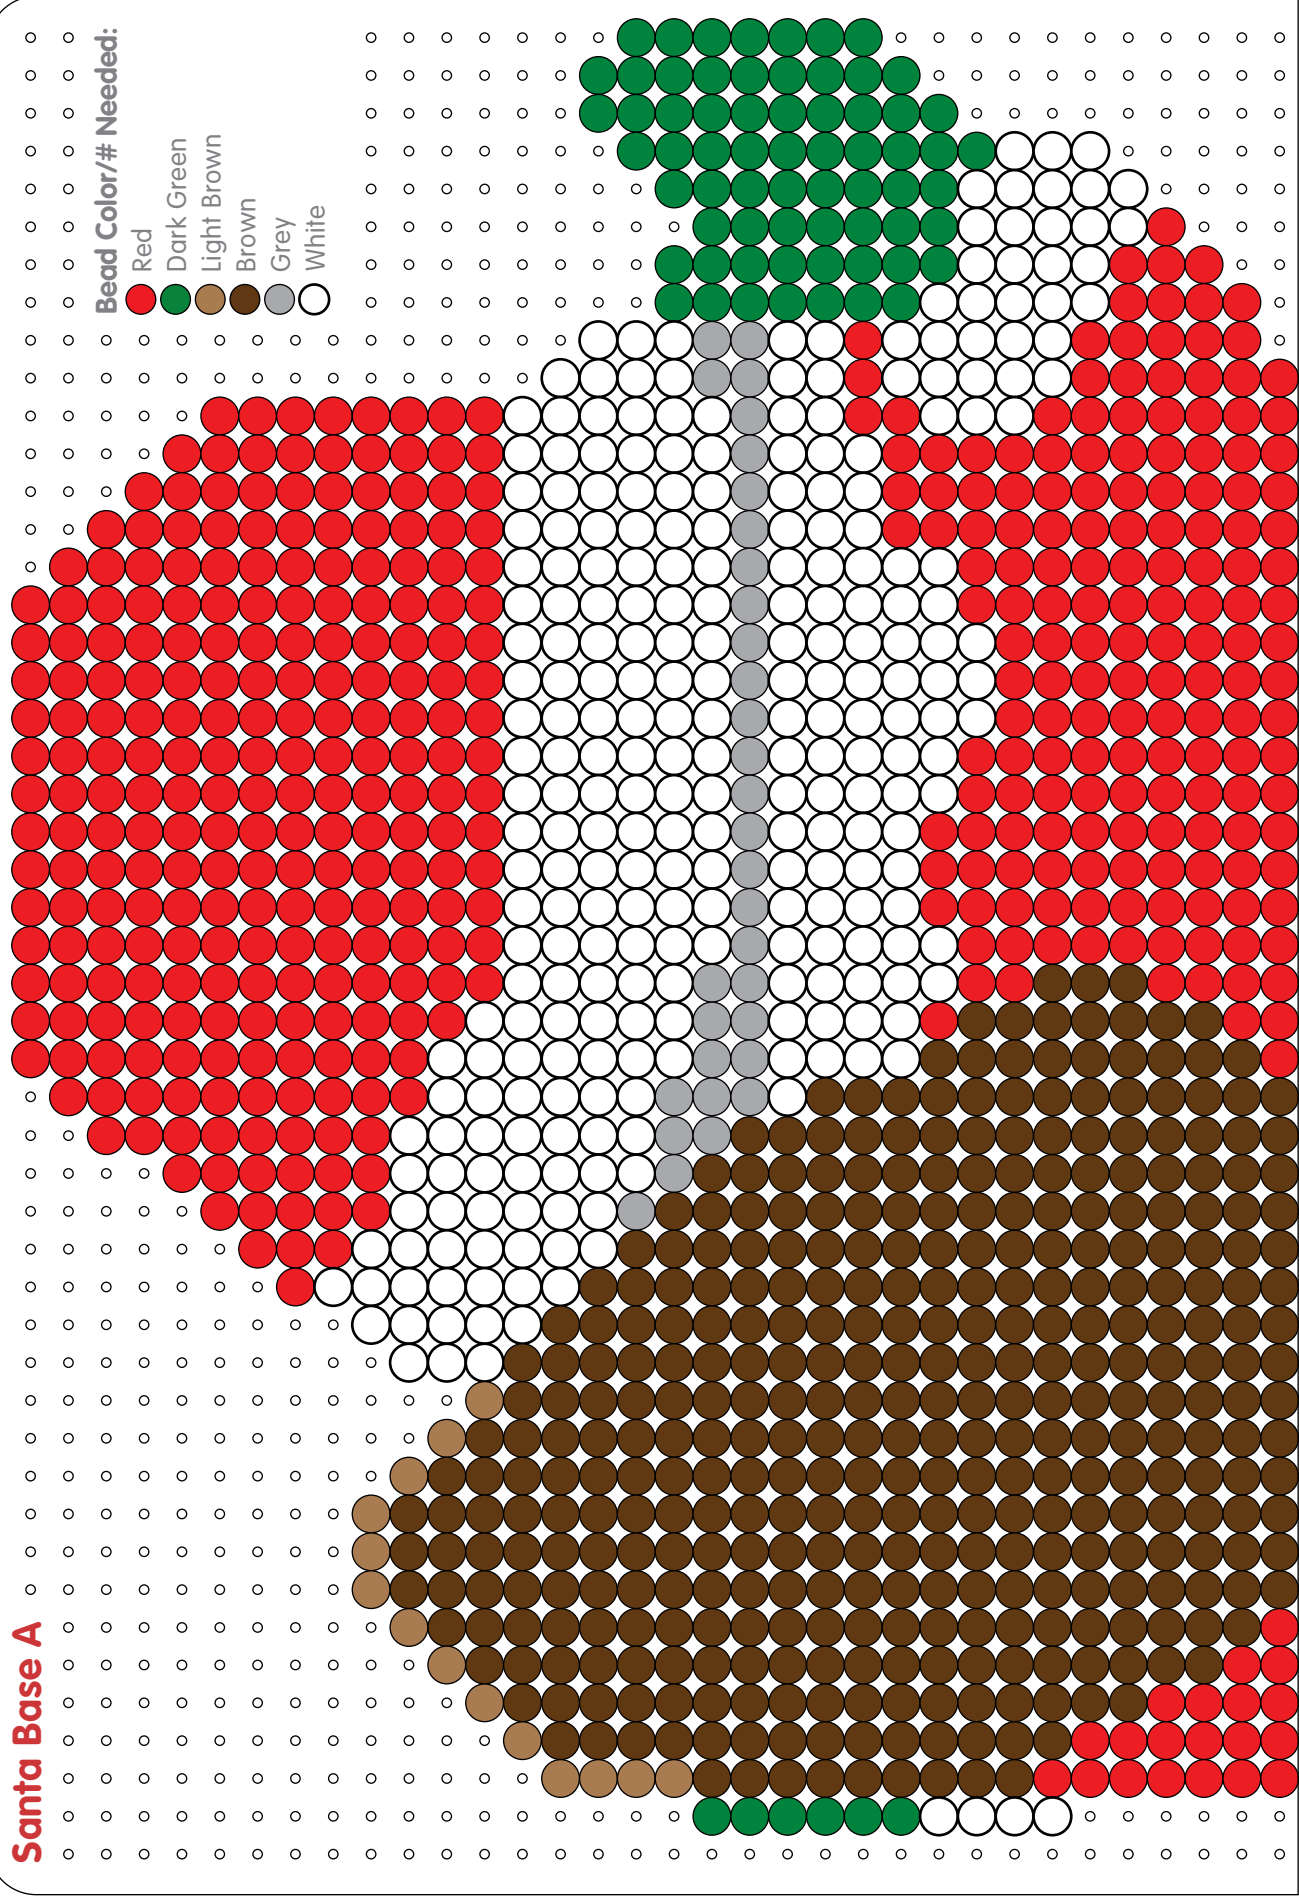

1. Place your pegboard on a flat, heat-safe surface.
2. Set a household iron to the medium setting. Place ironing paper over the pegboard. In a circular motion, begin to iron the project. When ironed properly, the beads will still have an open center. Let the design cool.
3. Remove the paper and bead design from the peg board. Flip the design over to expose the non-fused side. Repeat step two. Let cool completely.

Note: Beads need heat for about 10-20 seconds per side to fuse evenly. Depending on the size of the project, additional heating time may be required. Since you are working on a 3-D project, DO NOT OVER-IRON the beads as it will make the centers of the beads close and can make assembly more challenging.

3-D Santa

Santa Base A

Bead Color/# Needed:

- Red
- Dark Green
- Light Brown
- Brown
- Grey
- White
